

Rotations and Insecticide Resistance initial plots

Andy South and Ian Hastings

2017-10-05

Current state of play

1. Flexible number of insecticides between 1 & 5
2. Exposure can be set for each insecticide or same for all.
3. Starting frequency can be set for each insecticide or same for all.

Some example plots follow.

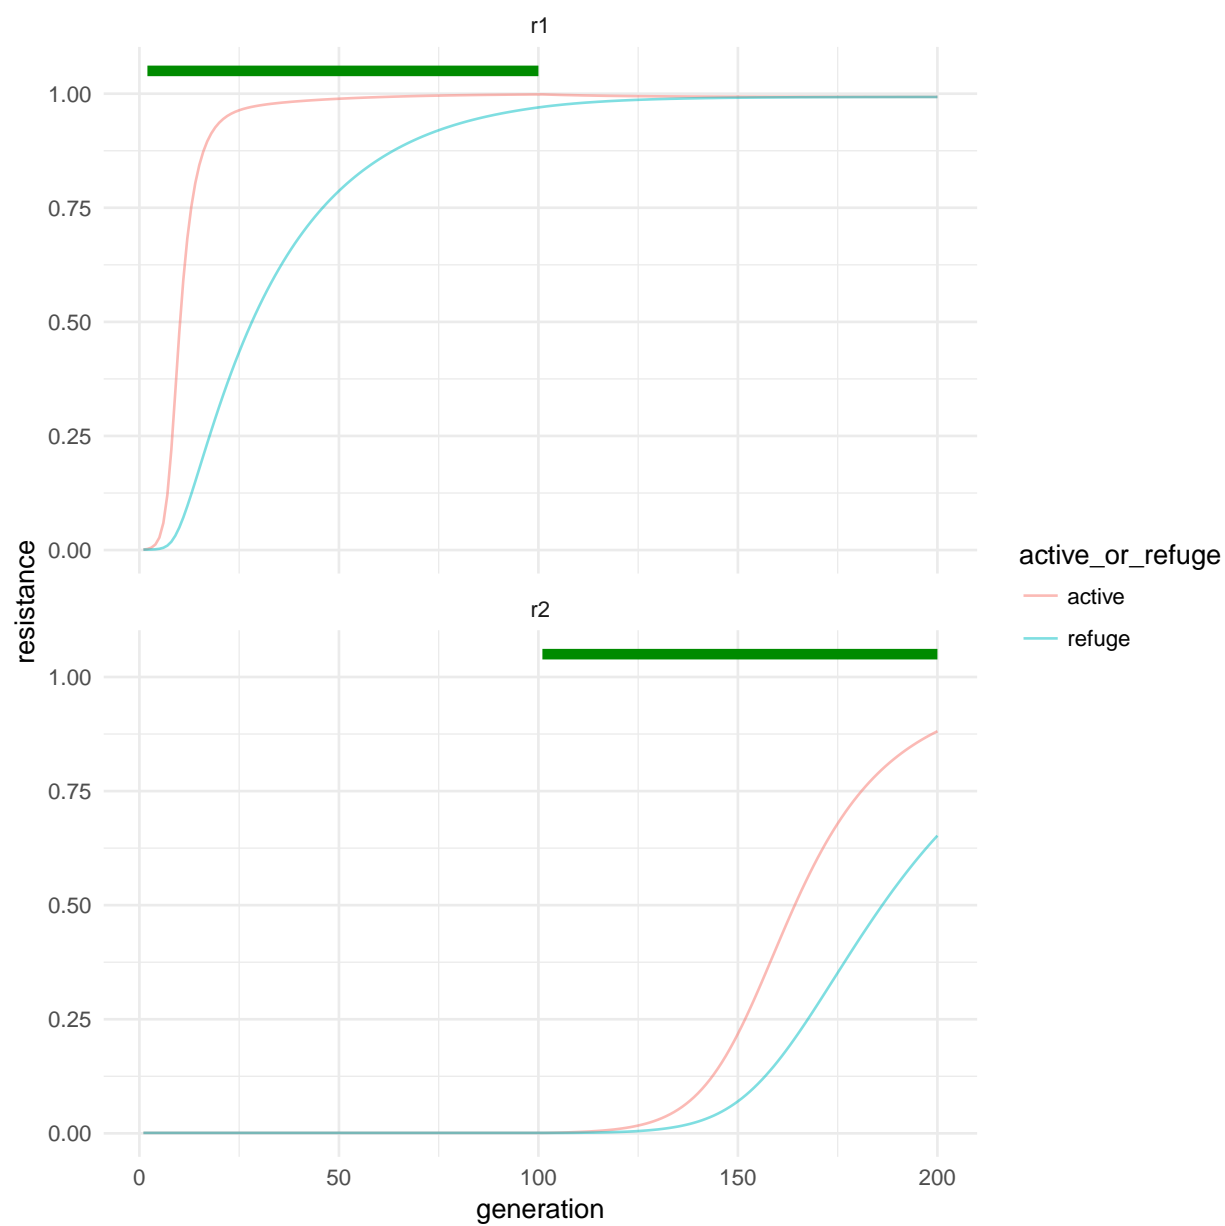

Figure 1: exposure set to 1 for r1 and 0.1 for r2

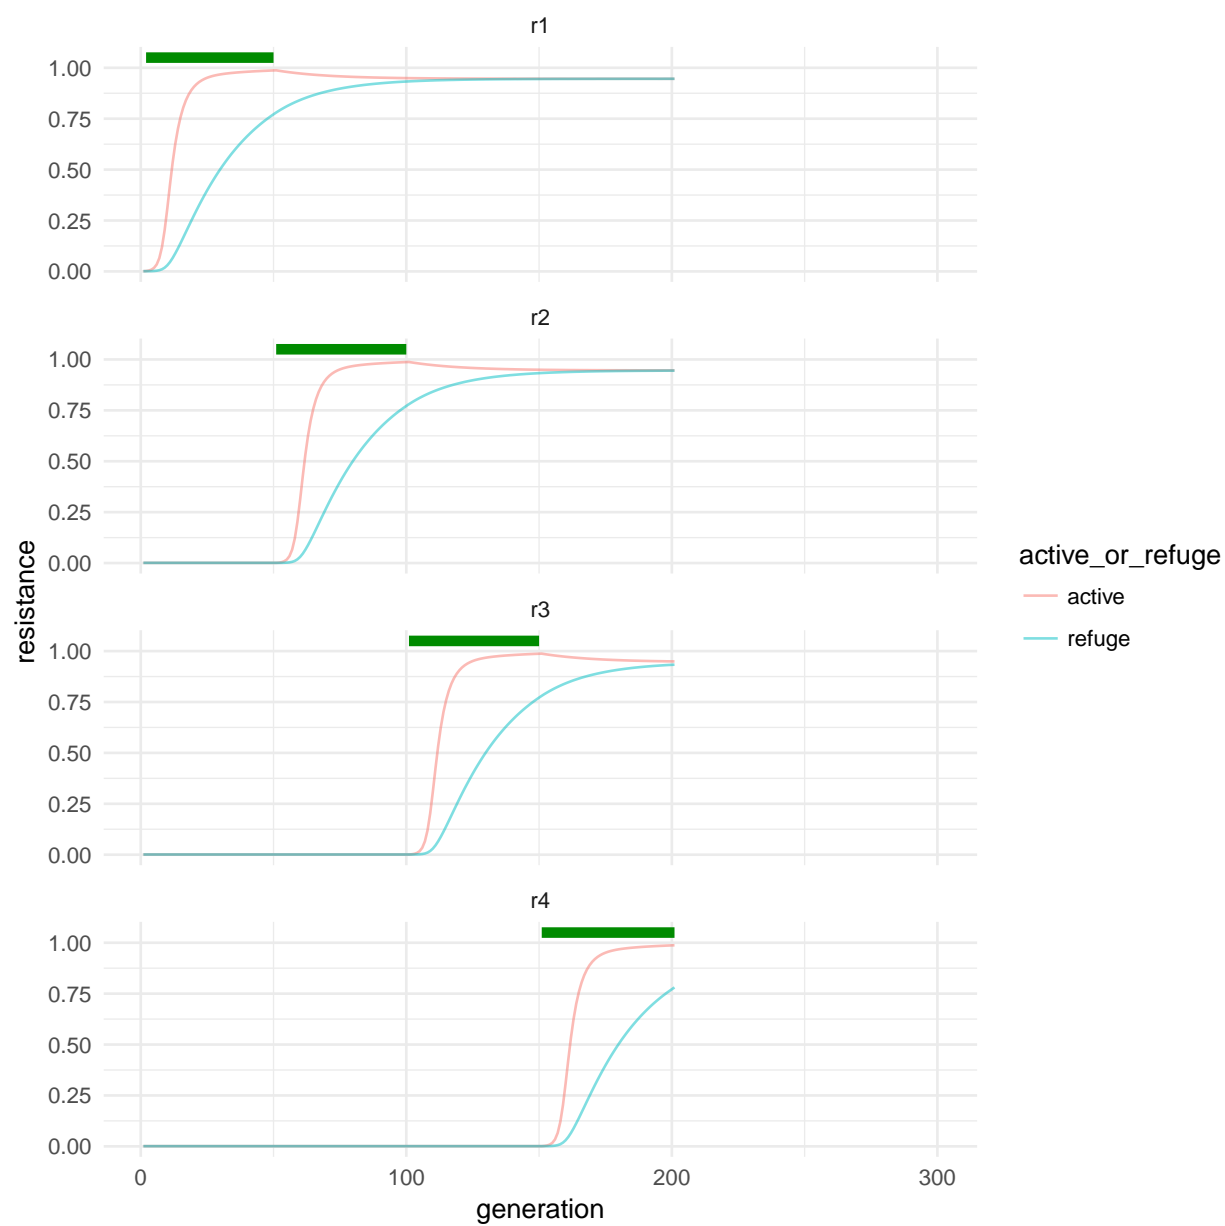

Figure 2: Rotation interval 50, migration 0.01

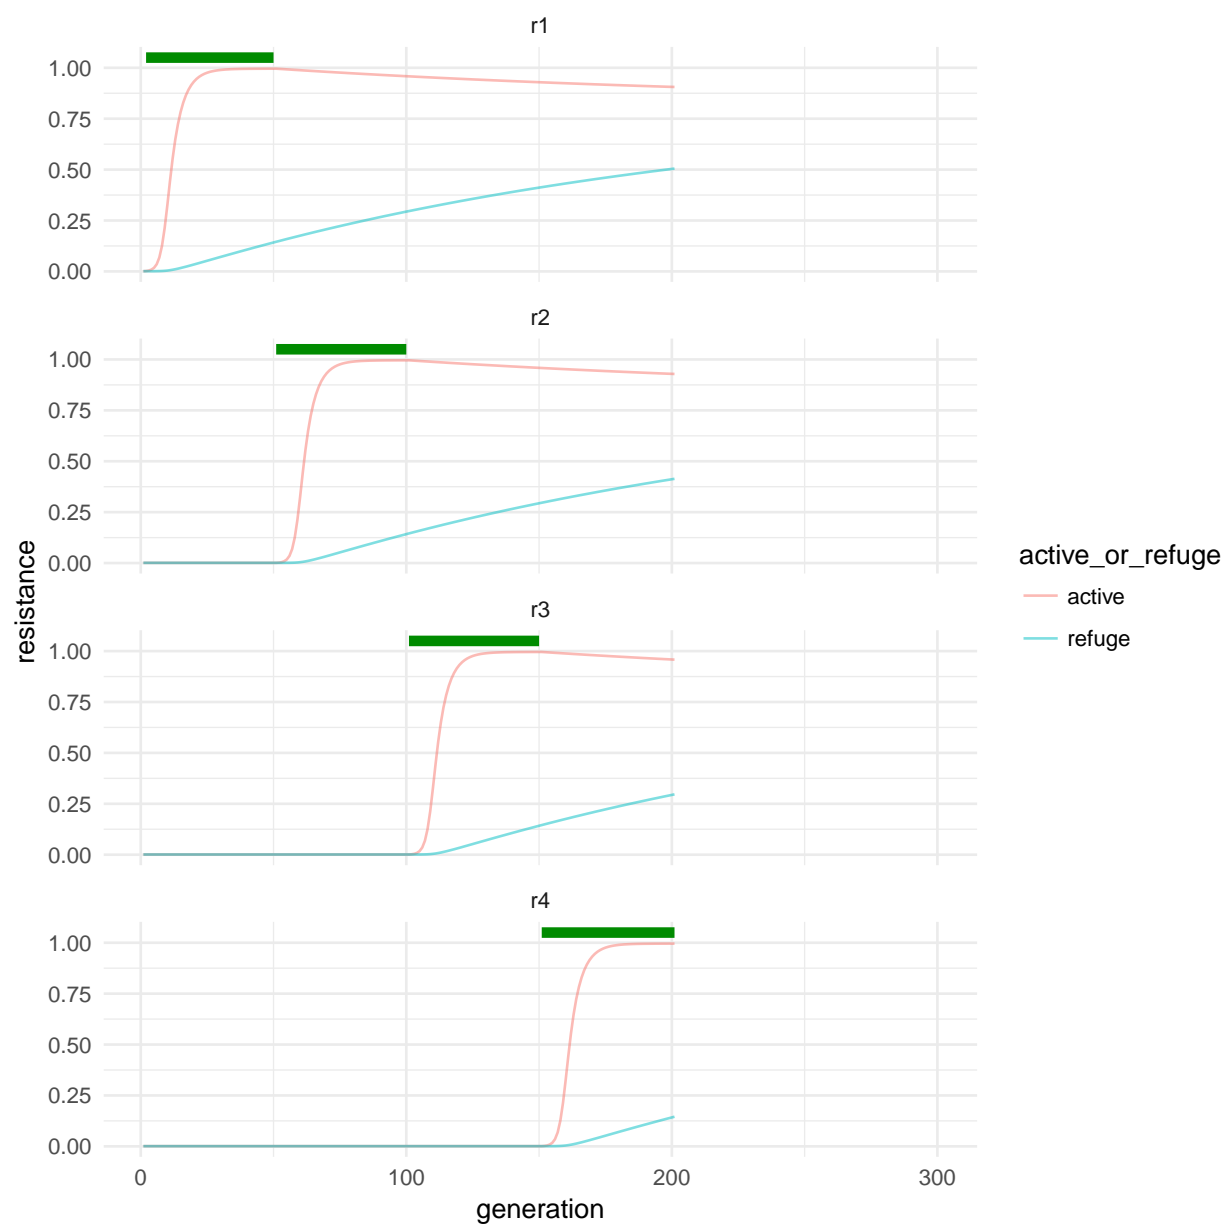

Figure 3: Rotation interval 50, migration 0.001

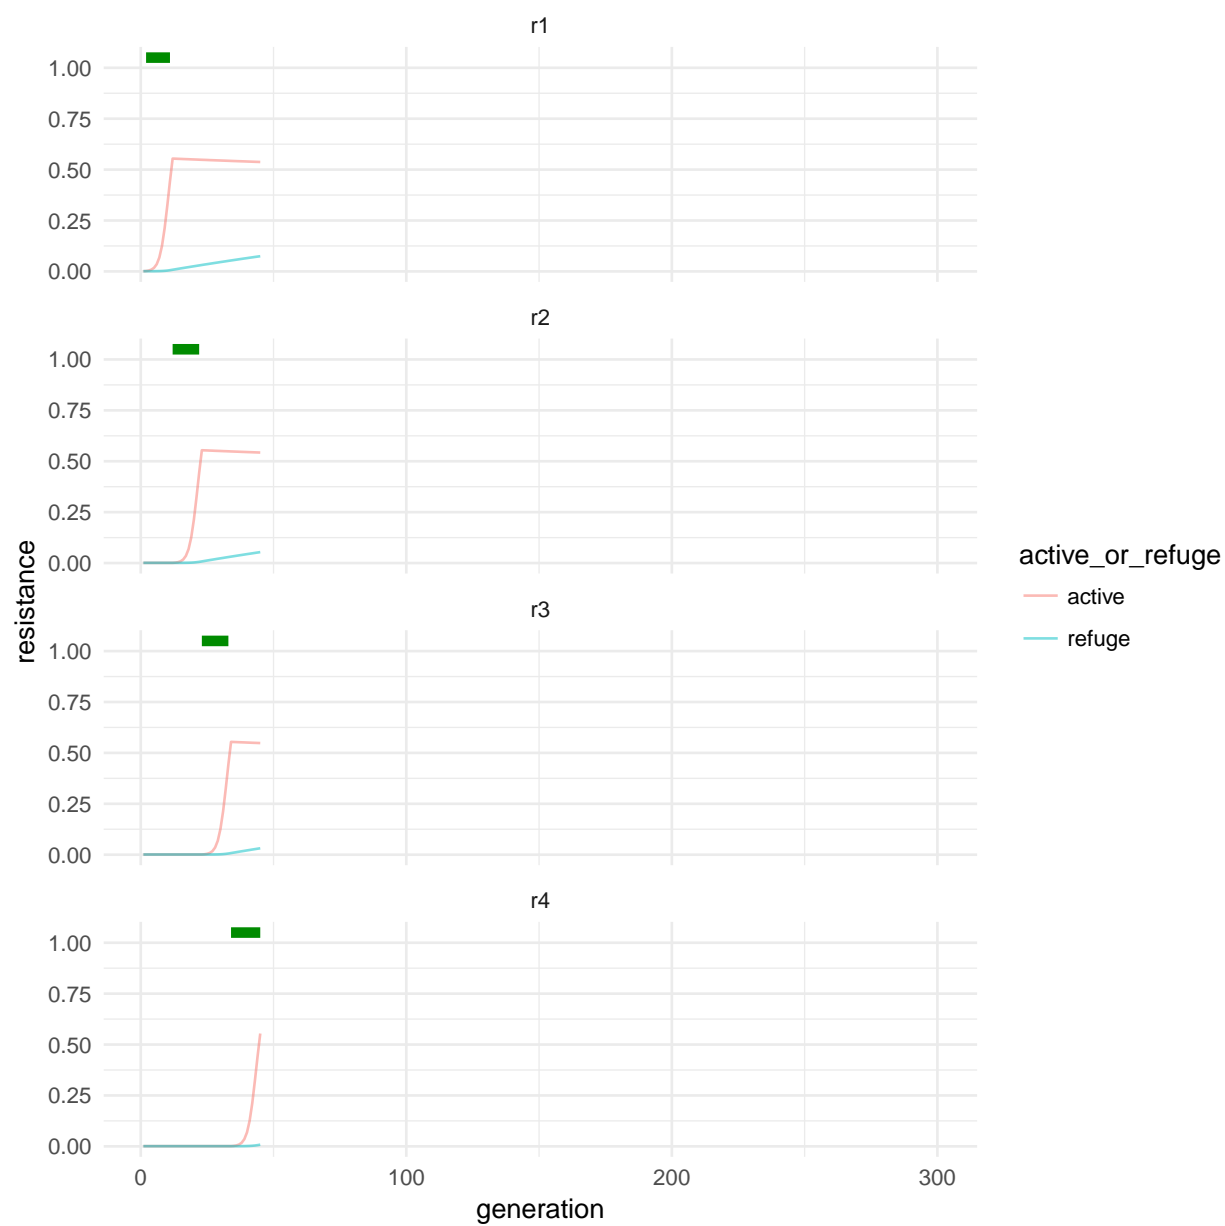

Figure 4: Rotate when resistant, migration 0.001
